

Crestline EVSD Extended Learning Plan 2021

The following Extended Learning Plan is designed to be fluid and flexible. Through the implementation of this plan, the students most impacted by learning loss due to the pandemic will be served. The plan will focus on specific academic skill gaps as well as social emotional areas impacted by the challenges of the past year. As new data emerges, the district will make adjustments to this plan to ensure our students are provided the supports needed to grow academically. Information regarding scheduling and enrollment in the programs will be shared directly with students and families. Contact the building principals for more information.

Impacted Students

Early identification through local assessments administered in the Fall of 2020; Fall TGRG assessments in grades K-3 helped determine which students had reading deficiencies; Continual monitoring of student learning outcomes and “gap closing” through Teacher Based Teams (TBT), Building Leadership Teams (BLT), and District Leadership teams (DLT); Social-emotional needs assessments through our partnerships with the Village Network and Community Counseling; Spring 2021 state tests and end of course exams; STAR360 Math and English Language Arts quarterly assessments

Needs

The district has conducted the comprehensive One Needs Assessment for all buildings and district level which takes a detailed look at academic data, attendance data, and discipline data. This data is disaggregated at the TBT and BLT level to identify the specific students with the greatest need. Those families will be contacted and given priority enrollment in the summer programming. Classroom and teacher-specific data were utilized to assign students into the after school component of the plan.

Resources and Budget

Staffing will be determined by the number of students enrolled in the after-school and summer programs. Currently, the district has hired seven certified staff and intervention specialists to be involved in the after-school portion of the Extended Learning Plan. We pay these staff an hourly rate, based on the collective bargaining agreement, using the district’s ESSER allocation. Specific academic resources will be purchased using ESSER funds, if needed. The counseling component of the Extended Learning Program is provided at no cost to the district through a partnership with The Village Network.

Approaches

The district has started an after-school tutoring program for any student in need of learning support. The program operates three days a week for an hour each day. It is staffed by certificated teachers and intervention specialists. Throughout the current school year, the Bulldog Academy online program provides opportunities for credit recovery for credit-deficient high school students.

Additionally, the district will offer summer tutoring sessions in partnership with the Village Network's therapeutic counseling program. The partnership will provide social-emotional and traditional academic enrichment and interventions for students who demonstrate the greatest need in these areas. Specific information about the summer programming including dates and times will be sent directly to families and posted here.

The District will use assessment data and survey data to monitor and measure the impact of the extended learning plan.

Partnerships

Current local and regional partners include but are not limited to:

Mid-Ohio ESC
State Support Team Region 7
The Village Network

Alignment

The Extended Learning Plans will be aligned to the following Crestline EVSD district and school plans:

Ohio Improvement Plan – District and building level
Village Network – NME and Therapeutic counseling plans
Graduation Pathway plans and At-Risk Plans for students in grades 6-12
